**Simply Green Distributors Inc. Announces Roll Out of Fuel Saving and Emission Reduction Technology with
dynaCERT's HydraGEN™ Line of Products**

Bringing you Innovating Products that Implement Green Initiatives and Save Money

Red Deer, AB - May 19, 2022 - Simply Green Distributors Inc. (SGD), a company founded in late 2021 in Red Deer, Alberta, announced today the immediate availability of HydraGEN™ products based on dynaCERT's patented and proprietary technology. dynaCERT Inc. is a public company listed on the Toronto Stock Exchange, trading under the symbol: DYA.

SGD is distributing a new line of products using hydrogen technology designed to make an enormous impact lowering emissions and designed to show important savings in fuel consumption in the oil & gas, construction and transportation industries. The products have been tested on multiple pieces of equipment - from commercial generators to trucks and construction equipment. The data collected from current clients indicate a fuel savings cost when applying this technology to equipment of Simply Green clients.

The hydrogen units, which are added as an aftermarket product to existing equipment or machinery, delivers hydrogen on-demand. With the use of distilled water, the units are up and running immediately after installation.

"We are committed to accelerating the world's growth to sustainable energy by implementing solutions for our environment, ethically and responsibly," stated James Pearce, President and CEO of SGD. A 20+ year veteran in the oil & gas and construction industry, James talks about the positive impact their clients are already seeing. *"Our clients want to make changes to help the environment, but they can also save fuel expenses in a market that is continuously fluctuating."*

Several major trucking and oil and gas companies in Western Canada were early to adopt the HydraGEN™ technology and committed to deploying HydraGEN™ products on their equipment.

SGD plans to be a worldwide leader with a global sales team and bring new technologies that bring clients closer to net zero. SGD is committed to delivering the latest green technology by researching and finding the newest technology available and giving their clients the opportunity to excel in lowering greenhouse gases.
